

Job Description

Role: AI/ML Engineering

Employment Type: Full-Time

Experience: 3 Yrs – 6 Yrs

Location: Ahmedabad

What Are We?

We are a pioneering AI-native enterprise transformation company, revolutionizing businesses through intelligent automation and data-driven innovation. We specialize in deploying experienced, certified AI and cloud professionals who architect scalable AI-first solutions using cutting-edge technologies like Retrieval-Augmented Generation (RAG), agentic automation, and modern infrastructure frameworks. We are passionate about building world-class AI capabilities that enable enterprises to harness autonomous intelligent systems for complex business operations. We focus on delivering bespoke AI modernization strategies and intelligent solutions tailored to each organization's unique digital transformation journey. Our success is measured by the tangible AI-driven business outcomes and operational intelligence we deliver to our clients

Who are We?

We are a bunch of passionate software professionals who love to work together and grow together!! We work, create, and inspire each other every day. We are a purpose driven collaborative team. We always want to give our best and we are dedicated towards achieving mutual success. Our corporate culture is unique, and each employee is valued here. We are always ready to walk the extra mile to satisfy our customers. Leveraging our cutting-edge expertise, we provide the best solutions to the clients. We are outcome obsessed and customer centric. We love to walk the talk. At WhiteBlue, we create the future for our customers in the areas of Cloud, Data and IoT.

Job Description:

- Design, develop, and deploy machine learning models using supervised and unsupervised learning techniques
- Build and optimize ensemble models such as Random Forest, Gradient Boosting, and XGBoost
- Apply Bayesian inference and probabilistic modeling to handle uncertainty and improve predictions
- Develop deep learning models, particularly Convolutional Neural Networks (CNNs), for image or pattern-based problems
- Evaluate model performance using appropriate metrics and validation techniques
- Implement model explainability techniques such as SHAP, feature importance, and other interpretability methods
- Collaborate with data engineers, product teams, and stakeholders to translate business requirements into ML solutions
- Document models, assumptions, and results clearly for technical and non-technical audiences

WhiteBlue Cloud Services Pvt Ltd

Registered address: Plot 120, Kavuri Hills – Phase 1, Jubilee hills, Hyderabad – 500033, Telangana, India

Corporate office: B 19, Tiru Vi Ka Industrial Estate, Guindy, Chennai – 600032, Tamil Nadu, India

Required Skills & Qualifications

- Strong foundation in machine learning algorithms (supervised & unsupervised)
- Hands-on experience with ensemble methods
- Knowledge of Bayesian inference and probabilistic reasoning
- Experience in deep learning, especially CNN architectures
- Practical experience with model explainability tools (SHAP, feature importance)
- Proficiency in Python and ML libraries (scikit-learn, TensorFlow / PyTorch)
- Understanding of data preprocessing, feature engineering, and model evaluation
