

PROFESSIONAL SUMMARY

SQL Developer and Application Support Engineer with 3+ years of experience in managing production databases, **troubleshooting query issues, and optimizing performance** in Oracle and MS SQL environments. Strong understanding of data flow between applications and databases.

- Proficient in database in writing complex queries using **Aggregate, Analytical, Joins, Sub Queries, Set Operators, String functions and other SQL Functions.**
 - **Proficiency in Analysing & Writing Stored procedure, Functions and Logical change implementation and working on various Change request.**
 - Having knowledge in Database objects like **Constraints, Index, Views & Table partition.** Created **materialized views** and **CTEs** for efficient data retrieval.
 - Designed and implemented **ETL workflows to extract data from multiple sources. Ensured data integrity and consistency during ETL processes**
 - Strong knowledge in End to End data flow from Frontend, API & Backend and skills on analysing Data by hitting APIs in various tools including POSTMAN
 - Strong Knowledge in **ITIL** framework - **Incident, Change, Problem management**, providing Root Cause within the established SLA's, and **Agile Process.**
 - Experience in handling **L1/L2/L3** level tickets with 24/7 Production support.
 - Knowledge in **Snowflake SQL** including **Data warehousing, Data lake & Migration, Snowpipe, Time travel, COPY command, Streams & Task and AWS Cloud.**
 - Experience in Extracting, Transforming, Analysing data from Database, AWS S3, and Snowflake. Job monitoring & monitoring Redshift Server (Cloud Watch)
 - Monitor and provide application and environment support, identify and resolve any productions issues and adhesive to closure of tickets within established SLAs.
-

EXPERIENCE

- i. Worked as software engineer in ESTONIX TECHNOLOGY from August 2022 to Oct 2024.
 - ii. Working as Technical engineer in Ivy Mobility Solutions from Nov 2024 to till date.
-

EDUCATION

Bachelor of Computer Science, MADRAS UNIVERSITY, Chennai.

SOFTWARE PROFICIENCY

PROGRAMMING LANGUAGE	: SQL, PL/SQL, T-SQL, Snowflake SQL
TOOLS	: SQL developer, SSMS, Excel, Jira, Servicnow
DATABASE	: Oracle DBMS (12c), SQL Server(V20)
CLOUD	: SNOWFLAKE, AWS S3

ESTONIX TECHNOLOGY

PROJECT #1

Client	:	IMB BANK
Role	:	Production support/ Development.
Technology	:	Oracle 11g,12c, UNIX.
Duration	:	Nov 2022 to Oct 2024 date

DESCRIPTION

IMB Bank is the longest standing building society in New South Wales and the third largest building society in Australia in terms of assets under management. IMB was established in 1880 as Illawarra Mutual Building society and is headquartered in Wollongong, New South Wales. IMB is regulated by the Australian Prudential Regulation Authority, and is a member of COBA, an independent organization representing building societies and credit unions.

ROLES & RESPONSIBILITIES

- Accessing database by using SQL developer tool.
- Coordinating with the local server team for server related issues.

- Performance Monitoring, analysing application slowness and rectifying the same.
 - Coordinating and providing support to the development team. Daily monitoring the database backups on various servers.
 - Developed SQL queries, SQL query tuning process and Schemas.
 - Wrote SQL Queries using Joins, Sub Queries and correlated sub-Queries to retrieve data from the database.
 - Solving Incident & Problem tickets within the SLAs and connecting with Client for Data flow & functionality clarifications.
-

IVY Mobility Solutions

PROJECT #2

Client	:	P&G(Procter & Gamble), DANONE
Technology:		SQL Server, Oracle SQL & Snowflake
Tools	:	Jira, Service now, Excel, AWS S3, AWS Redshift
Duration	:	NOV 2024 to till date

DESCRIPTION

Ivy Mobility Solutions Pvt. Ltd. is a leading enterprise software company specializing in cloud-based sales and distribution solutions for the consumer goods industry. Founded in 2002 and headquartered in Chennai, Ivy Mobility delivers integrated platforms for route-to-market execution, retail execution, and distributor management. The company serves global FMCG clients, enabling them to optimize field operations, streamline supply chains, and improve sales visibility through scalable, SaaS-based applications. Ivy Mobility operates across multiple geographies with a focus on innovation, data-driven solutions, and end-to-end automation of traditional distribution processes.

ROLES & RESPONSIBILITIES:

- **Collaborate directly with clients** through regular meetings to understand requirements, provide status updates, and clarify data-related issues for timely resolution.
 - **Analyse and debug complex stored procedures** to understand data flow logic, troubleshoot discrepancies, and perform necessary data updates at the backend using advanced SQL and DML operations.
 - **Validate data flow between APIs and mobile applications** by tracking API URLs and cross-verifying backend table records, ensuring data consistency and integrity across systems.
 - **Investigate and resolve critical production issues** by analyzing backend data behavior, performing root cause analysis, and coordinating with cross-functional teams to implement fixes efficiently.
 - **Leverage Snowflake for data transformation and analysis**, including loading data from relational databases, writing transformation queries, and preparing structured datasets for business reporting.
-
